SUMMARY

I am an IT student who has recently graduated with a BCA and will soon be pursuing an MCA. With a strong foundation in coding and problem-solving skills, I am now seeking an opportunity to begin my career as a Web Developer and contribute effectively to a professional team.

PROJECT

E-commerce Website

Modern online shopping interface

- Designed a clean and responsive front-end for an e-commerce platform using HTML, CSS, and JavaScript. Focused on user experience with product listings, filters, and cart design.
- Github Link
 - <https://github.com/Milan-Italiya/E-Commerce-website>

Course Selling Website

Modern online learning and course selling platform

- Built a full-stack MERN course selling app with a responsive React frontend for students (browse, checkout, profiles) and an admin dashboard to manage courses, users, and sales, backed by Node.js, Express, MongoDB, JWT auth, REST APIs, payment integration(stripe) and full CRUD in courses.

 - <https://github.com/Milan-Italiya/Course-Selling-Website>

Snake Water Gun

Classic fun game to play against the computer

- Built a simple Snake Water Gun game using HTML, CSS, and JavaScript with a clean, responsive UI where users can play against the computer, see results instantly, and enjoy a smooth game experience.
- Github Link
 - <https://github.com/Milan-Italiya/Snake-Water-Gun>

Guess The Number

Fun browser-based number guessing game

- Built a simple Guess the Number game using HTML, CSS, and JavaScript with a clean, responsive UI where players guess a number, get higher/lower hints, and see results instantly — all running fully in the browser.
